• Problem solving.

• Willingness to accept new challenges.

• Excellent goal tracking and report writing.

• Ability to work under the pressure.

• Expert in responsive, mobile-first development.

• Ability to learn and multitasking in a fast-paced environment.

Career Overview

I am a self-taught front-end developer, proficient in HTML, CSS, Javascript, primarily focused on writing clean, elegant and efficient code. Eager to identify and resolve software defects by reviewing code errors, log files and othe troubleshooting techniques. Actively learning new technologies and staying up-to-date on industry trends and advancements. Over the past few years, I have been designing, building single page applications and UI layouts. With passion for both personal growth and software development, I attended different courses to learn new languages while sharpening existing skills. Ready to apply my passion for coding to a talented engineering team to develop quality solutions.

Work Experience

2022

2021

2020
